Managing pest animal impacts – prevention, containment and monitoring

Queensland Pest Animal Symposium 2010

Join us at the Queensland Pest Animal Symposium to be held at the Gladstone Entertainment Centre from Tuesday 3 to Thursday 5 August 2010.

The exciting Symposium program will consist of:

- new innovations, latest research and management techniques, community initiatives and policy matters
- field trips and trade displays.

150–250 delegates are anticipated to attend over the three days of the Symposium.

Themes

- Pest ecology, environmental and production impacts
- Pest control including urban and peri-urban pest management, community engagement
- Monitoring for management. Why or how to interpret the data
- Emerging impacts and issues, new and updated techniques, animal welfare.

Call for papers opening on 7 October 2009

Submit your abstract online at www.pestanimalsymposium.com.au
