

# Taking the Trash Out of Gladstone's Tidal Wetlands

If you are interested in:

- \* Learning about mangroves and tidal wetlands in the Gladstone region
- \* Discovering the many benefits tidal wetlands provide to our ecology
  - \* Monitoring changes to shorelines and river estuary health
  - \* Helping with surveys of estuary and coastline condition
- \* Getting advice and training on tidal wetland and coastal habitats from expert

These exciting professional development opportunities are open to all community members. Join the team for a mix of discussions and in field activities discovering how to complete current shoreline and saltmarsh monitoring and the methodology reducing the threats to these critical ecosystems.

Information about the ongoing Tidal Wetland health assessments and opportunities to be involved will be provided.

## Information evening

Friday 10th May 6—8pm

Boyne Island Environmental Centre

Light refreshments provided

## Shoreline and saltmarsh monitoring training Day

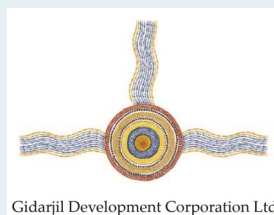

Saturday 11th May 8:30am—3:30pm

Boyne Island Environmental Centre

Please bring your own lunch, sun smart clothing, closed in shoes and water bottle. Morning tea provided.
