Join us at FBA's Flow Centre to hear from scientists, industry groups and landholders about local water quality projects in the Fitzroy Basin, and the latest on reef science programs.

This event will cover topics including:

- ✓ Why water quality matters to the Fitzroy region
- ✓ The science that is happening in the Fitzroy region
- ✓ An overview of Paddock to Reef Integrated Monitoring, Modelling and Reporting program
- ✓ 2021 climate trends
- ✓ The importance of water quality report cards
- ✓ A landholder's view of FBA's Brigalow Offset program

Everyone is welcome!

If you're interested in how our region's precious natural resources are being monitored, improved and protected come along to this event!

The Paddock to Reef Integrated Monitoring, Modelling and Reporting Program (Paddock to Reef program) in the Fitzroy Basin is a collaboration involving government agencies, industry bodies, Fitzroy Basin Association, landholders and research organisations.
